

Gizelis Robotics presents  
the new, innovative

# TOWER

UV-C DISINFECTION

germicidal ultraviolet  
technology robot!

Disinfection Tower is a portable UV-C system for surface disinfection. UV technology reduces the risk of infections by inactivating bacteria and viruses.

The device was developed as a supplement to standard cleaning in rooms where no personnel are present. The Tower is the new powerful and effective mobile disinfection unit for small to medium sized rooms. It is ideal for disinfecting areas such as hotel rooms, meeting rooms, offices, clinics, dental surgeries, bathrooms and many more.

## Specifications

- 99,9% reduction of majority of virus and bacteria within minutes
- 360° disinfection adjunct to standard terminal cleaning processes
- Very simple operation, user friendly and minimal training required
- Quick set up, lightweight, easy to move around
- Increased operator safety
- Produces no ozone or other secondary contaminants
- No additional chemicals necessary
- Remote operation by tablet/smart phone using sophisticated app

## Technical Data

<b>Length</b>	51cm
<b>Width</b>	43cm
<b>Height</b>	150cm
<b>Weight</b>	50kg
<b>Connectivity</b>	Native App
<b>Disinfection Mean</b>	UVC radiation 254 nm
<b>Capacity</b>	10x75 W lamps

### The power to protect

There are numerous applications where ultraviolet germicidal irradiation is an ideal disinfection solution.

#### Workplaces

Germs can be picked up from phones, keyboards and stationery

#### Hospitals

Viruses and bacteria are particularly dangerous in a medical setting

#### Schools

Railings, desks, door handles, sanitation surfaces and toys are examples of frequently touched surfaces

#### Fast Food Restaurants

Germs and bacteria are common in raw and wasted foods

### The power to protect

There are numerous applications where ultraviolet germicidal irradiation is an ideal disinfection solution.

#### Retail

High-touch areas such as shopping trolleys and cash registers have a high risk of transmitting germs

#### Entertainment

Facilities should continue to provide surface disinfection that is adequate for the expected occupants

#### Hospitality

Restrooms are one of the most common places to find harmful germs and bacteria

#### Banking

High-touch surfaces like cash machines and deposit/withdrawal slip stations pose risks for virus transmission
